# dataFEED OPC UA Tunnel

OPC UA Tunnel Functionality Supporting Simple and Secure OPC Classic Communication

- **Inter-Network OPC Classic Communication without DCOM**
- **Ensuring High Data Security for Factory-level Applications**
- **Easy to Use**

No need for complex DCOM settings

- Easy industrial communication by avoiding DCOM and its complex security settings on the OPC Server and OPC Client side
- Time-saving configuration of OPC Classic communication across networks
- Effective and efficient configuration of distributed automation systems with many OPC Classic servers

Compliance with specifications for computer, network and data security

- Ensuring high data security for factory-level applications by using the security mechanisms of the OPC UA standard, e.g. exchange of certificates
- Authentication via username and password including user certificates
- Data encryption using current encryption algorithms
- Enables secure OPC UA communication across firewalls and DMZs with OPC UA Reverse Connect

Secure cross-computer OPC Classic communication

- Intuitive wizard-based configuration of the OPC UA tunnel connections including certificate generation and certificate exchange
- Configuration of a secure OPC UA tunnel connection without OPC UA expertise using the practice-oriented default settings
- Automated creation of the OPC UA Tunnel Client configuration by importing the OPC UA Tunnel Server configuration
- Use of a common OPC namespace for access by OPC Classic clients
